

ABX CO<sub>2</sub> MIRABAX

ASTROABAX  
ENGRAVING SOLUTIONS

Alta velocidade, até  
1000mm/s com 1G de  
aceleração

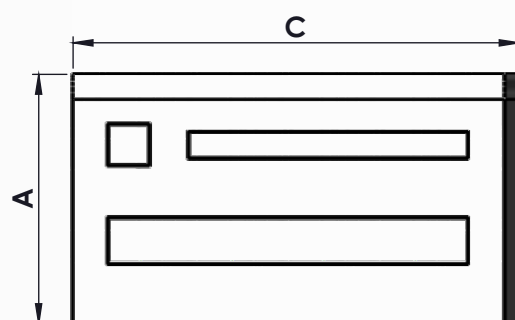

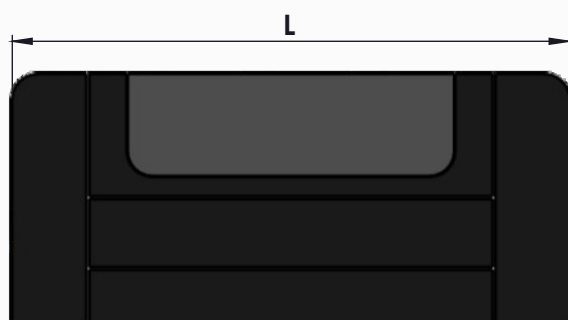

Design compacto para  
trabalhar em espaços  
pequenos

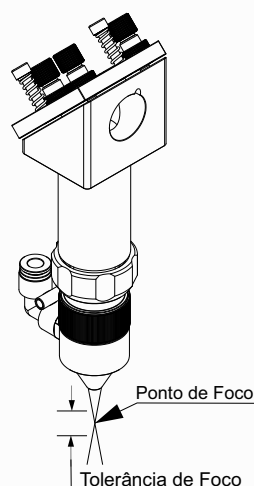

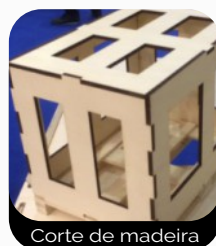

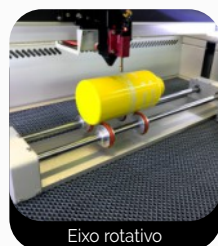

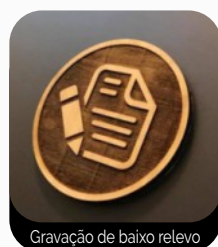

Laser de precisão para  
gravações de qualidade

## Dados Técnicos

|                               |                     |
|-------------------------------|---------------------|
| <b>Potência</b>               | 60W/80W             |
| <b>Tecnologia</b>             | Laser CO2           |
| <b>Comprimento de onda</b>    | 10600nm             |
| <b>Velocidade de gravação</b> | 1000mm/s            |
| <b>Espessura de linha</b>     | ±0.2mm              |
| <b>Área de trabalho</b>       | 700x450mm/900x600mm |

| Modelo      | L      | C      | A     |
|-------------|--------|--------|-------|
| <b>7045</b> | 1105mm | 885mm  | 495mm |
| <b>9060</b> | 1350mm | 1050mm | 495mm |

Componente de suporte  
óptico facilmente  
modificável.
